

implying that the release of lysosomal hydrolases by PMN may occur early in the life of a comedo, and could thus play a role in the evolution of a papule or pustule.

We greatly appreciate the assistance of Ann Stevenson.

## Announcement

Call for Abstracts for the Southern Regional Meeting of The Society for Investigative Dermatology, Inc., Sunday, November 16, 1980, 1:00-5:00 PM at the Marriott Hotel, San Antonio, Texas. This is in association with the Southern Medical Association's Annual Meeting.

Anyone interested in presenting a talk should submit an abstract of not more than 200 words, their name and address by Sept. 15, 1980, to: Colonel John W. White, Jr., USAF MC, Chairman, Department of Dermatology (SGHMD), Wilford Hall USAF Medical Center, Lackland AFB, Texas 78236. Talks presented at regional meetings may be presented for presentation at other SID meetings as well.
